

KST 110

- Stud welding equipment with capacitor discharge
- Suitable for welding steel, stainless steel, aluminium and brass
- Weldable stud range 3-10 mm stud diameter
- Continuously adjustable charging voltage
- Digital display of charging voltage
- Weight only 9,9 kg
- Steel housing, powder-coated

Technical data

Weldable stud range Ø (mm)	3-10
Weld rate (pieces studs... /min)	M 10/8, M 6/15
Capacitance (µF)	99000
Mains connectionspannung (V)	115/230
Charging voltage (V)	50-200
Main fusing, time-lag (A)	6,3
Frequency (Hz) 50/60	50/60
Power consumption (W) 700	700
Dimensions (LxBxH) mm (without handle and appliance leg) 330×190×280	330×190×280
Weight approx. (kg)	9,9
Class of protection	IP23
Protection class	1
Cooling	F
Working temperature range (°C)	0-45
